References

- Official Face Recognition package by Adam Geitgey
  - This official Python package is a major inspiration behind this project. The pre-trained face-recognition models as well as some ML coding practices are referenced from this package
- Official Website of Dlib
  - dlib face recognition models and functions to access them to get optimal results are referenced from this website
- Official Website of OpenCV
  - from webcam recording to storing unknown images are referenced from this website
- Real Python Website
  - The realpython.com is another major reference for this project
  - Simple SMTP mailing with TLS security is referenced from this website
- FreeCodeCamp
  - FreeCodeCamp has been a reference to set up proper development environment for python programming in Virtual Environment
